Cybersecurity Resource Planning (ClearArmor)

The CSRP is a unique offering. CSRP provides full understand of the relationship between business, technology, risk, and CyberSecurity. The offering provides the ability to manage the clients' cyber program as well as perform foundational technical functions. The result is designed, structured, sustainable, and standards based CyberSecurity. Based on our offering, ClearArmor was recently accepted into the NIST Cyber Security Center of Excellence (NCCoE).

[Website](#)

The CSRP is comprised of two elements:

1. **Momentum Methodology (M2)**, the complete practitioner guided process to assess, configure, and design the clients CyberSecurity program. M2 will guide the client through the assessment, gap analysis, roadmap creation, governance, cyber PMO (CMO), etc. M2 feeds into the configuration of the ICSP as well as setup and management of the program.
2. **Intelligent CybersSecurity Platform (ICSP)**, provides the application interfaces, and technology stack to manage the framework, audit, risk management, systems scanning, vulnerabilities identification, mapping of data points (business to technology), training, and phishing simulations.

Hacking Portal (InnoTec)

With InnoTec's Hacking Portal, your organization will have a vulnerability management lifecycle tool. It allows for prioritization efforts and facilitates the management of vulnerabilities. This tool helps your company decrease the exposition time against threats and ensures that the process is conducted correctly.
